

Compliance Manager

Compliance solution for NetSuite

Take control of regulatory, quality and management compliance obligations within your NetSuite application.

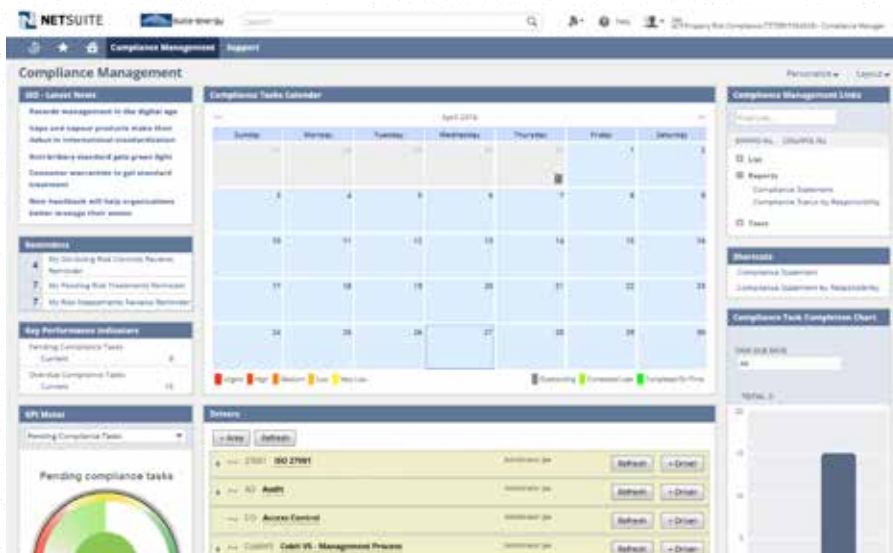

The Compliance Manager SuiteApp allows companies to proactively manage all compliance requirements within NetSuite, the world's leading cloud Enterprise Resource Planning (ERP) and Customer Relationship Management (CRM) platform.

Whether a company chooses NetSuite as a CRM or as a full ERP, it can now control corporate, quality, standards and audit compliance activities across the entire organisation.

Offline spreadsheets, documents and third party applications are replaced by a single user-friendly SuiteApp: the Compliance Manager, a "Built for NetSuite" certified application.

The platform enables all users to access their specific compliance obligations via the employee centre role. Users are notified and reminded of tasks and deadlines on a periodic basis, while compliance managers benefit from a macro view across all compliance groups and simply produce a periodic compliance statement, referencing all evidence.

The Compliance Manager SuiteApp effectively streamlines a company's compliance process through its intuitive user-interface which advances a quality corporate culture.
